

# Safety instructions for **LIQUID-FILLED VINYL RECORDS**

**HANDLE WITH CARE:** Always handle the record gently and avoid subjecting it to any sudden impacts or shocks. Never force the record onto the turntable.

**PROTECT FROM SUNLIGHT:** Do not expose the record to direct sunlight, as prolonged exposure can cause the vinyl to warp, leak, and result in fading of the colours. While the record undergoes thorough inspection before shipment, it is important to note that due to the variety of materials used, a 100% guarantee of condition cannot be ensured.

**PROPER STORAGE:** After use, carefully re-wrap the record in its protective packaging, ensuring the filling hole (located next to the label) faces upwards to prevent damage. Always store the record in an upright position.

**RESTORING COLOUR:** If you notice colours fading, gently shake the record. Some colours contain pigments that settle over time; shaking will help redistribute the pigments, restoring the full colour effects.

**SAFETY PRECAUTIONS:** The liquid inside the record is not for consumption and is not safe for contact with the skin. In the event of contact, wash the affected area immediately and seek medical attention if necessary.
